

SPARTA-QUARTZ

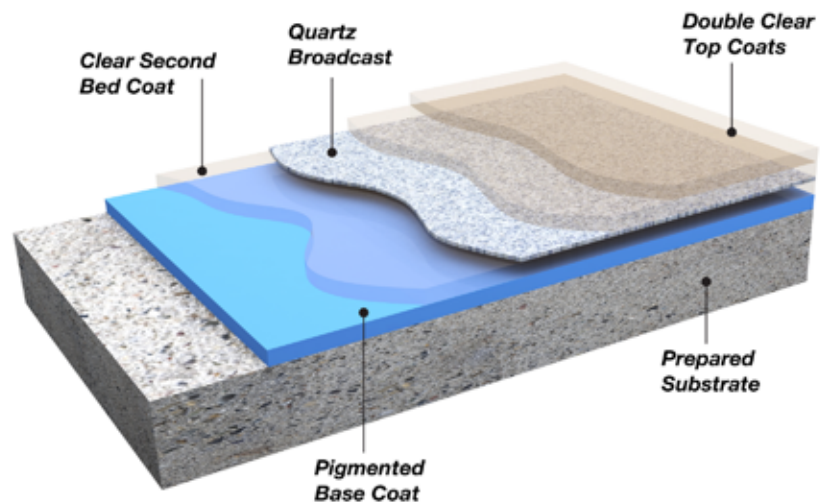

Heavy-Duty Quartz Flooring Systems
by HP Spartacote®

HP Spartacote's Sparta-Quartz™ system is designed for maximum durability and rapid return to service. This unique commercial and industrial flooring system combines ultra-tough colored quartz aggregate with HP Spartacote's Patented DCC® polyaspartic coating technology. The result is an incredibly strong flooring system suitable for the most demanding heavy traffic environments. Sparta-Quartz™ is especially effective in commercial & industrial projects that require minimal downtime. This system can be installed in just one-day with a full return to heavy traffic service within 12-hours.

Sparta-Quartz™ is completely UV stable and is ideal for a variety of indoor/outdoor commercial and industrial settings:

- Pool Decks
- Machine Shops
- Parking Garages
- Manufacturing Plants
- Stairs and Walkways
- Food Preparation
- Veterinarian Clinics
- Swimming Pool Decks
- Showers and Locker Room
- Commercial Kitchens
- Restrooms
- Residential Garages

Features and Benefits:

Durability: Outstanding adhesion to concrete, triple the abrasion resistance of standard epoxies.

Color Gloss Retention: UV stable colored quartz and 100% UV clear top coats make Sparta-Quartz ideal for heavy traffic exterior surfaces.

Chemical Resistance: Resistant to a wide range of industrial chemicals. Anti-microbial surface, USDA & FDA approved.

All Climate Application: Apply down to -30° F.

Green Friendly: Ultra-Lo VOC and Lo emitting coatings available to help generate LEED credits.

Rapid Return to Service: System application in a matter of hours with next-day full return to service.
